

PRODUCT DATA SHEET

REMOTELY CONTROLLED

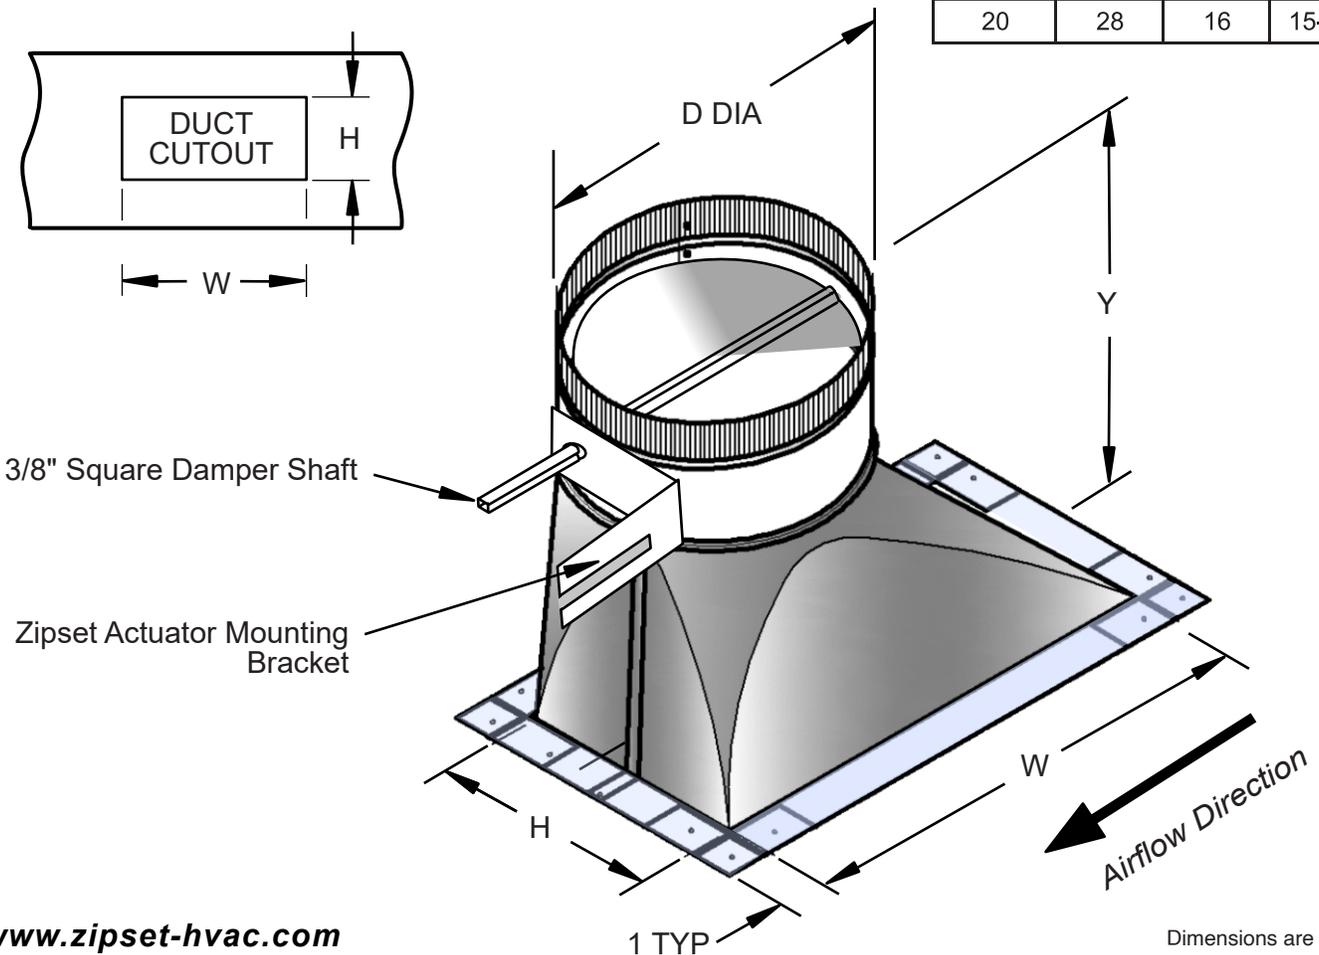

PRODUCT FEATURES

- 45° Take-Off balancing damper used for remote adjustment of airflow feeding air outlets
- Single blade damper with V-groove design for increased rigidity
- 3/8" square damper shaft rotating in polymer bearings
- Actuator anti-rotation bracket is factory installed and ready to accept the Zipset low voltage actuator (actuator field installed)
- 1" wide mounting flange with corner clips and pre-punched screws holes

OPTIONAL FEATURES

- Factory attached Zipset Actuator
- PSA gasketed perimeter flange with release paper to hold fitting securely in place during installation and minimize air leakage
