

PRODUCT DATA SHEET

**CONICAL TAKE-OFF
BALANCING DAMPER (STEEL)**

REMOTELY CONTROLLED

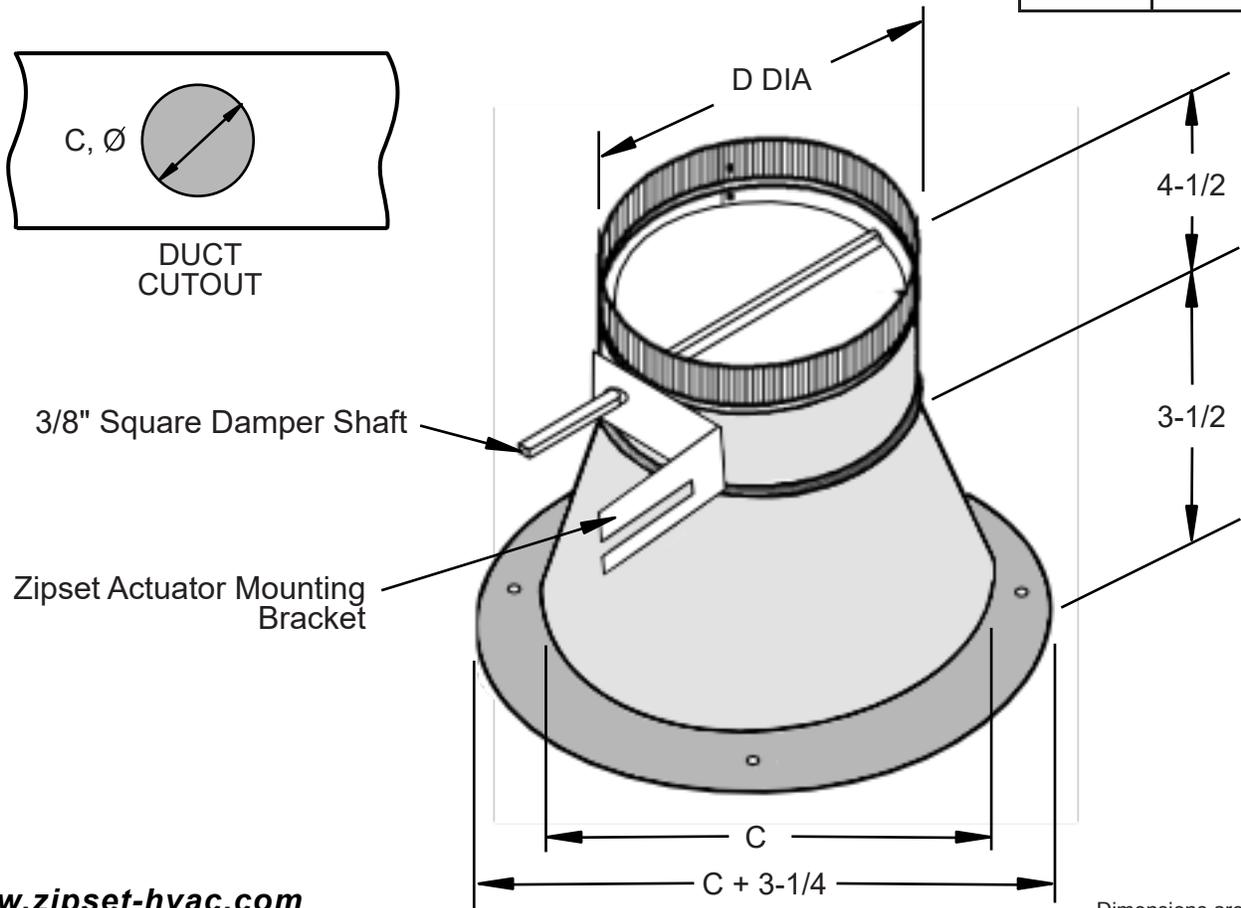

PRODUCT FEATURES

- Conical Take-Off balancing damper used for remote adjustment of airflow feeding air outlets
- Galvanized steel construction
- Single blade damper with V-groove design for increased rigidity
- 3/8" square damper shaft rotating in polymer bearings
- Actuator anti-rotation bracket is factory installed and ready to accept the Zipset low voltage actuator (actuator field installed)
- 1-5/8" wide mounting flange w/ pre-punched screws holes

OPTIONAL FEATURES

- Factory attached Zipset Actuator
- Field installed Zipset Actuator (ordered separately)
- PSA gasketed flange with release paper to hold fitting securely in place during installation and minimize air leakage
