

# The ZipSetSystem™

## PRODUCT DATA SHEET

Model **CRW-A-1**  
**CEILING**  
**RECEPTACLE**

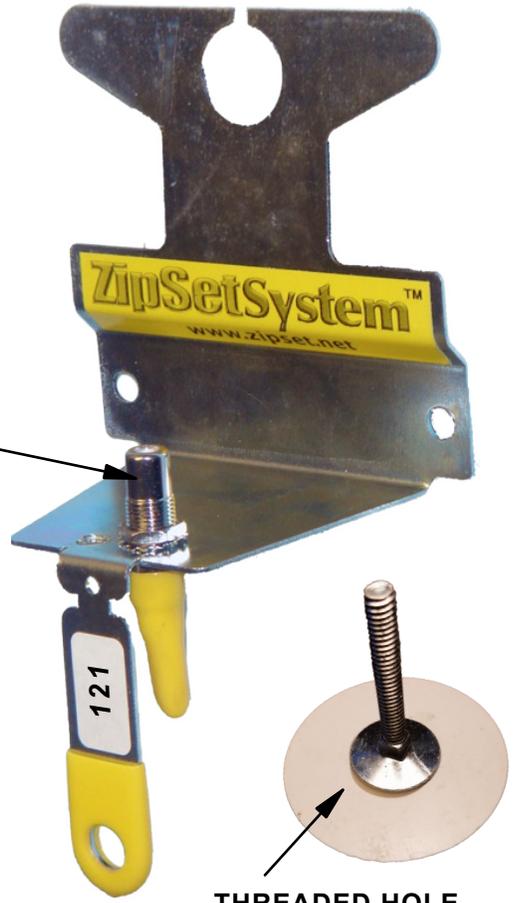

### FEATURES:

- Used when the connection to the Zipset actuator terminates in a hard ceiling and usually only a few feet from the balancing damper
- Ingenious design allows the receptacle to easily mount to any industry standard Tee grid.
- Receptacle is installed prior to hard ceiling / GWB installation. Finger makes sure a hole is provided for access
- White threaded hole cover (2-3/8" Dia) masks access hole after balancing. Paintable if desired.
- Saves on material and labor costs since no auxiliary support framework is required
- Self-drilling screws are field supplied
